

ASSEMBLY

1. Check that all parts are present:
 - 1 pcs main frame with front fork
 - 1 pcs brake lever and 1 pcs rear brake (depending on model)
 - 2 pcs inflatable wheels 12"
 - 1 pcs handlebars with stem, 1 pcs seat (see picture 1)

Assembly must be done by professionals.

2. Release the nuts on hubs of front wheel. If needed adjust the bearings on wheel, so that the wheel can move freely (the wheel can not be stiff but can not move too much). Insert the front wheel to the front fork and tighten the nuts.
3. Insert the stem with handlebars to the main frame. Follow the mark on stem for minimum depth. Align the stem with the handlebars so that the longitudinal axis of the handlebars is perpendicular to the axis of travel. Then tighten the handlebars with the Allen screw in the stem (Picture 6). For proper geometry, the slight bend of the fork must face forward.
4. Slide the seat to the required height and tighten sleeve.
5. If a brake is included, insert the oval end of the brake cable into the larger round hole (different types of levers may have different attachments) located on the brake lever and insert the brake cable into the socket on the bottom of the handlebars (picture 2). Press both V-brake arms towards the wheel rim and with the appropriate wrench (depending on the model), adjust the brake blocks so that when braking the blocks rub their entire braking surface against the side of the rim (picture 5) if necessary, tighten or loosen the brake cable screw (picture 3) or adjusting screw on the brake lever so that there is a gap of approx. 1-2 mm between the rim and the brake block (picture 4). If the wheel does not turn freely and "brakes" on one side, adjusted the tightening of the tensioning screw on the V-brake arm, which "brakes" the wheel (picture 3), or by loosening the tensioning screw on the V-brake arm, which is further from the rim so that the wheel rotates freely. Always check the function of the brake before riding. If the brake lever (on the handlebars) contains an adjusting screw (located on the side of the lever), it can be shortened to shorten the distance between the lever and the handle (according to the size of the hand).
6. Inflate the tires according to the rider's weight, but not more than the value marked on the tires (bar / psi). If you are unsure about the assembly, entrust the product to a specialist or contact your distributor.

RIDING INSTRUCTIONS

By sitting on the seat, holding the handlebars with both hands, and alternately bouncing the left and right legs (as when running), you will achieve riding. By lifting the legs while riding, children learn controlled balance. Braking is done with your feet, just like when running, or by pressing the brake lever (if equipped).

SECURITY PRECAUTIONS

Read the instructions carefully before assembly. The balance bike has a maximum load capacity of 50 kg. Check that all bolts and nuts are tighten. For safe riding, always wear a helmet, knee, elbow and wrist protectors and sturdy shoes. The balance bike is not intended for riding on roads in road traffic and for riding in the dark. Do not use them in rain, on wet slippery surfaces, gravel, or snow. Check bolts, tightening mechanisms and brakes regularly to prevent possible riding accidents. Do not brake too hard and suddenly - you could fall. The manufacturer is not liable for damage that may occur while using this product. The balance bike is intended for 1 rider only - no passengers! Not suitable for children under 3 years, contains small parts that can be inhaled. Breaking mechanisms (brake blocks, rims, etc.) become hot during use and it is therefore inappropriate to touch them after braking.

MAINTENANCE

We recommend entrusting the maintenance to a professional service. Regularly check, tighten or adjust bolted joints, tightening mechanisms, lubricate sliding parts (wheel bearings, handlebar bearings, cables, brake parts, etc.) Before each ride, check all bolts and their tightening, or the correct

function of the brake, if included). In case of wear of some parts (tires, bearings, brake parts, etc.), it is necessary for the safety of the rider to replace them (with parts according to the original parameters) and adjust them. If the parts are soiled, wipe them with a damp cloth, do not use ammonia, petroleum products, solvents and other chemicals, use oil for sewing machines and bicycles on the bearings in the wheels. When lubricating, grease must not get on the brake friction surface of the rim and the brake block; if this situation occurs, all brake parts must be degreased, e.g. with technical petrol. If it starts at "crack" in the string when riding, it is necessary to tighten the wheel wires evenly by 2 turns (entrust to a professional service), or lubricate, adjust or replace bearings and bearing parts. If it is necessary to change the wheels, always use wheels / tires with the same parameters as the original ones. Disassemble in the opposite way to assembly (see Assembly). Have the tire and tube replaced or repaired by a specialist. If the frame design contains self-locking nuts or other self-locking mechanisms, frequent loosening and tightening will result in loss of effectiveness. In this case, the used parts must be replaced.

TERMS AND CONDITIONS OF WARRANTY, WARRANTY CLAIMS

General Conditions of Warranty and Definition of Terms

All Warranty Conditions stated here under determine Warranty Coverage and Warranty Claim Procedure. Conditions of Warranty and Warranty Claims are governed by Act No. 89/2012 Coll. Civil Code, and Act No. 634/1992 Coll., Consumer Protection, as amended, also in cases that are not specified by these Warranty rules.

The seller is SEVEN SPORT s.r.o. with its registered office in Strakonická street 1151/2c, Prague 150 00, Company Registration Number: 26847264, registered in the Trade Register at Regional Court in Prague, Section C, Insert No. 116888.

According to valid legal regulations it depends whether the Buyer is the End Customer or not.

"The Buyer who is the End Customer" or simply the "End Customer" is the legal entity that does not conclude and execute the Contract in order to run or promote his own trade or business activities.

"The Buyer who is not the End Customer" is a Businessman that buys Goods or uses services for the purpose of using the Goods or services for his own business activities. The Buyer conforms to the General Purchase Agreement and business conditions.

These Conditions of Warranty and Warranty Claims are an integral part of every Purchase Agreement made between the Seller and the Buyer. All Warranty Conditions are valid and binding, unless otherwise specified in the Purchase Agreement, in the Amendment to this Contract or in another written agreement.

Warranty Conditions

Warranty Period

The Seller provides the Buyer a 24 months Warranty for Goods Quality, unless otherwise specified in the Certificate of Warranty, Invoice, Bill of Delivery or other documents related to the Goods. The legal warranty period provided to the Consumer is not affected.

By the Warranty for Goods Quality, the Seller guarantees that the delivered Goods shall be, for a certain period of time, suitable for regular or contracted use, and that the Goods shall maintain its regular or contracted features.

The Warranty does not cover defects resulting from (if applicable):

- User's fault, i.e. product damage caused by unqualified repair work, improper assembly, insufficient insertion of seat post into frame, insufficient tightening of pedals and cranks
- Improper maintenance
- Mechanical damages
- Regular use (e.g. wearing out of rubber and plastic parts, moving mechanisms, joints, wear of brake pads/blocks, chain, tires, cassette/multi wheel etc.)
- Unavoidable event, natural disaster
- Adjustments made by unqualified person

- Improper maintenance, improper placement, damages caused by low or high temperature, water, inappropriate pressure, shocks, intentional changes in design or construction etc.

Warranty Claim Procedure

The Buyer is obliged to check the Goods delivered by the Seller immediately after taking the responsibility for the Goods and its damages, i.e. immediately after its delivery. The Buyer must check the Goods so that he discovers all the defects that can be discovered by such check.

When making a Warranty Claim the Buyer is obliged, on request of the Seller, to prove the purchase and validity of the claim by the Invoice or Bill of Delivery that includes the product's serial number, or eventually by the documents without the serial number. If the Buyer does not prove the validity of the Warranty Claim by these documents, the Seller has the right to reject the Warranty Claim.

If the Buyer gives notice of a defect that is not covered by the Warranty (e.g. in the case that the Warranty Conditions were not fulfilled or in the case of reporting the defect by mistake etc.), the Seller is eligible to require a compensation for all the costs arising from the repair. The cost shall be calculated according to the valid price list of services and transport costs.

If the Seller finds out (by testing) that the product is not damaged, the Warranty Claim is not accepted. The Seller reserves the right to claim a compensation for costs arising from the false Warranty Claim.

In case the Buyer makes a claim about the Goods that is legally covered by the Warranty provided by the Seller, the Seller shall fix the reported defects by means of repair or by the exchange of the damaged part or product for a new one. Based on the agreement of the Buyer, the Seller has the right to exchange the defected Goods for a fully compatible Goods of the same or better technical characteristics. The Seller is entitled to choose the form of the Warranty Claim Procedures described in this paragraph.

The Seller shall settle the Warranty Claim within 30 days after the delivery of the defective Goods, unless a longer period has been agreed upon. The day when the repaired or exchanged Goods is handed over to the Buyer is considered to be the day of the Warranty Claim settlement. When the Seller is not able to settle the Warranty Claim within the agreed period due to the specific nature of the Goods defect, he and the Buyer shall make an agreement about an alternative solution. In case such agreement is not made, the Seller is obliged to provide the Buyer with a financial compensation in the form of a refund.
